Economic Dependency Ratio - is the number of transfer payment dollars received as benefits in a given area, compared to every \$100 of employment income for that same area. For example, where a table shows an Employment Insurance (EI) dependency ratio of 4.69, it means that \$4.69 in EI benefits were received for every \$100 of employment income for the area.

Social Assistance - includes payments made in the year on the basis of a means, needs or income test (whether made by an organized charity or under a government program). The value is reported on line 145 of the personal income tax return.

Canadian Business Patterns

- **Data reflects counts of statistical establishments by Standard Industry Classification (SIC) and geography,**

Statistical Establishment

A statistical establishment is the smallest grouping of **production entities** which:

- a) Produces as homogeneous a set of goods and/or services as possible;
- b) Does not cross provincial boundaries;
- c) Provides data on the value of output together with the cost of principal intermediate inputs used along with the cost and quantity of labour resources used to produce the output.

For example, a plant in the manufacturing industry which provides accounting information regarding the value of shipments (sales), direct costs and labour costs is considered a single establishment. Two stores in the retail industry may be considered one establishment if the accounting information for both these locations is combined when the business is reporting income.

Data for Canadian Business Patterns was available for the following municipalities for the following years:

Small Area Retail Trade Estimates

Small Area Retail Trade Estimates (SARTRE) is a system of developing user defined tabulations of retail sales and number of locations by one, two or three digit standard industrial classification (SIC), for incorporated retailers for Forward Sortation Areas (first three characters of the postal code). These data are derived by integrating survey data on chain stores with tax data (for non-chain retailers).
